OBJECTIVE

Fort Pitt Capital Group's Unconstrained Equity Strategy is designed to generate long-term capital appreciation by investing in a concentrated portfolio of U.S. focused companies across market capitalizations.

The strategy seeks to realize long-term capital appreciation and investment returns in excess of broad equity indices over a full business cycle.

It is comprised of the portfolio management team's highest conviction investment opportunities with a long-term approach to realizing full stock value potential.

Bottom-up analysis strives to identify stocks trading at discounts to intrinsic value, companies with attractive long-term growth rates, and those poised to benefit from catalysts such as positive revenue, cash flow, and earnings growth.

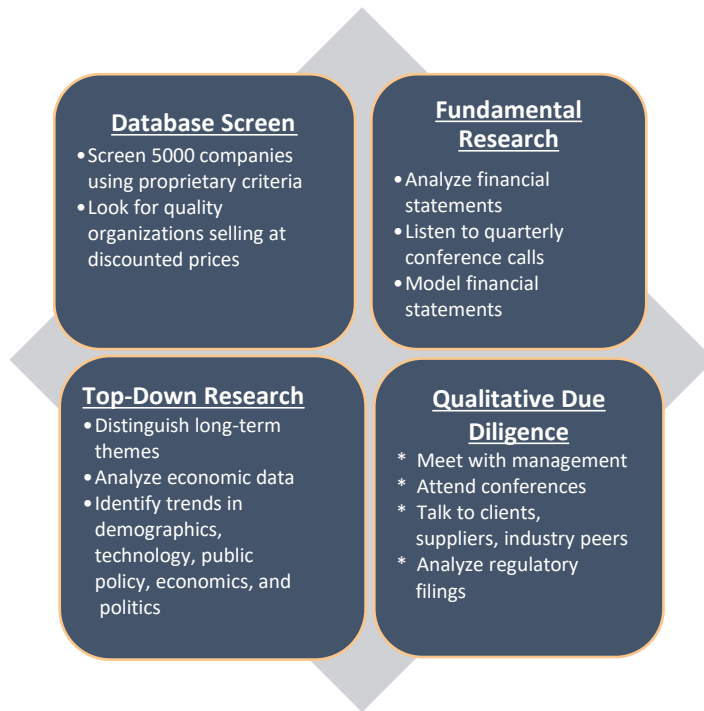

The strategy employs a concentrated allocation approach, can invest in companies across all market capitalizations, and is not constrained by sector concentration limits.

INVESTMENT PROCESS

The Fort Pitt Capital Unconstrained Equity strategy applies a concentrated and unconstrained approach comprising the team's highest-conviction investment ideas. We invest with a long-term view and the mindset of a business owner, not that of a stock trader. Over the long-term, companies with strategic competitive advantages, innovative products and services, and excellent management teams will grow the value of their businesses at above-average growth rates. The team performs in-depth fundamental research to thoroughly understand businesses, management's vision, and competitive landscapes to identify companies believed to have the best opportunities for long-term capital appreciation.
